

About

- ENRAG is an engineering company that specializes in **cyber physical models and simulations** in **process-, chemical- and power industry and mechanical engineering**.
- **Our focuses:**
 - **Tailor made process model IT Tool development and programming (e.g. for automation, automated CAD)**
 - **Computational Fluid Dynamics (CFD) in the field of industrial chemical engineering and combustion**
 - **Chemical engineering and process engineering**
 - **Combustion engineering and plant simulations**
 - **Process simulations**
 - **Steam generator simulations**
- **Founded 2010**
- **7 Employees**
